EKITS GUIDE

The e-kits interactive CDrom is the hub of the e-kit. Here you can access all the features of the CD including;

- Install clock designer
- View the clock designer quick start and user guides
- Access clock and time worksheets (pdf format)
- View design, print and build guides.
- View video assembly guide
- Take the clock quiz
- Browse our handpicked clock and time web links

VERSATILE

Here are some ideas of what you can create

- **Photo clocks**
Add photos and images from your digital camera, scanner or computer.
- **Logo clocks**
Use your logo and make your own company, organisation, association or school clock.
- **Gift clocks**
Make a truly individual birthday or Christmas gift, and give a fantastic present for your friends and family.
- **Clocks for any room**
Because the clock designer has so many different styles of numbers, backgrounds and divisions you can design a clock to suit any room.
- **Unusual clocks**
Design a clock without numbers? Or maybe one with just divisions. Design a clock with seconds instead of hours. It's up to you. Millions of different combinations are possible!
- **Craft clocks**
Create your own range of clocks and sell through your craft or art business.

CLOCK MOVEMENTS, HANDS AND DIALS

A wide selection of clock parts are available from your ekits supplier or online from www.ekitsonline.com. Clock designer will print your clock's face, to fit anything from a small CD Sized clock to a large wall clock and can even print directly onto cd's.

WHAT YOU NEED

Requires a Windows PC (with Windows 2000/XP and a minimum of 64Mb ram and 64Mb free HD space) and a printer. To build your clock you will need a clock mechanism, hands, dial and battery (sold separately)

SITE LICENCE EDITION

As well as the standard single user edition, an unlimited machine site licence version is also available.

Designed and made in the U.K.
